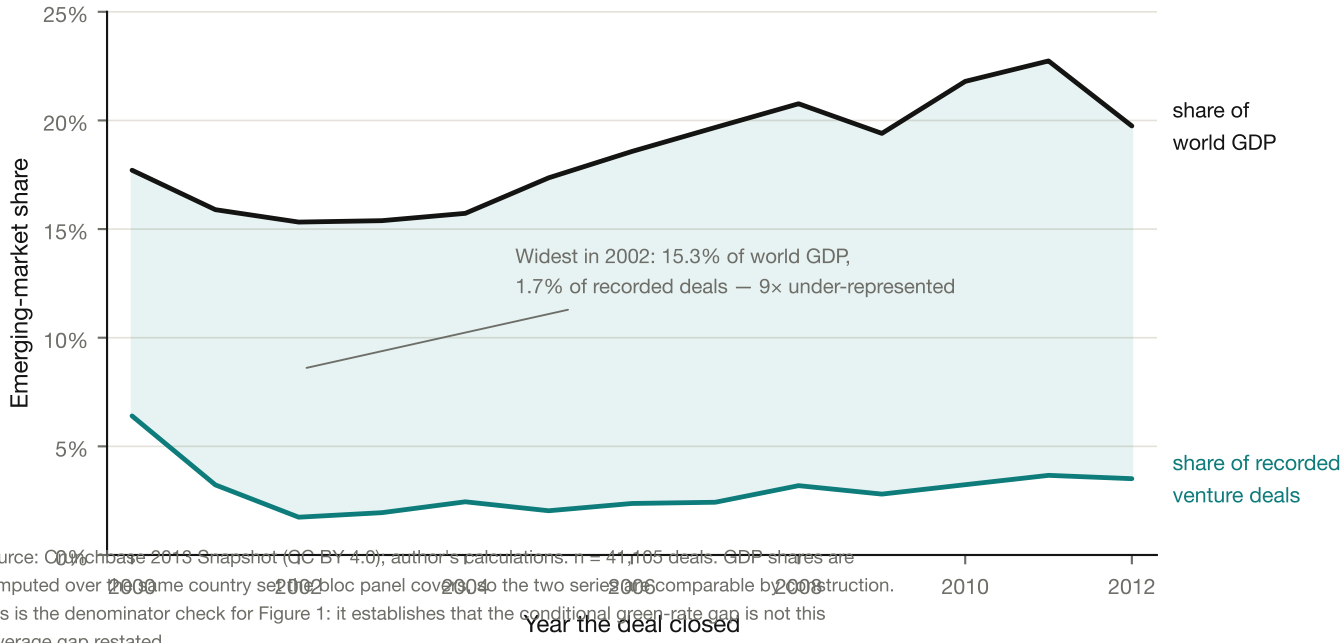
Emerging markets hold a fifth of world GDP and a fiftieth of the venture record

Emerging-market share of world GDP against its share of recorded venture deals, 2000–2012.



Source: Crunchbase 2013 Snapshot (CC BY 4.0), author's calculations. n = 41,105 deals. GDP shares are computed over the same country set as the deal panel so the two series are comparable by construction. This is the denominator check for Figure 1: it establishes that the conditional green-rate gap is not this coverage gap restated.
